VIBRO-LASER™

A unified technological ecosystem for diagnostics and rapid commissioning of industrial equipment

SHAFT ALIGNMENT

VIBRO-LASER PRO — A revolution in the world of laser alignment!

SMARTDISTANCE™
Automatic distance control system

SMARTSHIFT™
Detection zone extension system

SMARTCONTROL™
A new measurement method with automatic recording of multiple parameters for each measurement point

SMARTSCAN™
Automatic measurement unit tuning system

Advanced patented solutions in the field of laser alignment

PATENT № 050869

VIBRO-LASER™ Alignment

Available for Android mobile devices

Intuitive 3D interface

Access additional features using an electronic key

Google Play

Scan the QR code and download the VIBRO-LASER™ apps

vibro-laser.com

VIBRO-LASER™

A unified technological ecosystem for diagnostics and rapid commissioning of industrial equipment

VIBRATION & BALANCING

VIBRO-LASER VIBRATION

EXPRESS DIAGNOSTICS

Vibration readings along three axes, temperature measurements, and fault detection on a single screen

VIBRATION ANALYSIS

Spectral and third-octave analysis, frequency markers, data saving and comparison

BEARING DATABASE

Convenient search for the required bearing in the built-in database saves time during diagnostics and equipment parameter setup

BALANCING

Balancing using error theory in up to two planes and two points, taking into account all three directions — X, Y, Z

VIBRO-LASER™ Vibration

Wireless balancing

Available for Android mobile devices

Vibration analysis and fault detection

Google Play
